

iENGINEERING

Listen. Understand. Solve. Deliver.

iENGINEERING is a privately owned firm that specializes in providing reliable technology solutions to several organizations around the world. Our solutions have assisted those organizations in streamlining their processes and allowed them to enhance their business productivity in remarkable terms. Apart from that, we are also engaged in research and development which helps us adapt to the rapidly changing technology trends across the globe.

Managed Cloud Services

We specialize in building end-to-end cloud infrastructure and managing it. We have deployed cloud infrastructure for our customers on all platforms including Amazon Web Services, Microsoft Azure and Google Cloud Services. iENGINEERING's cloud infrastructure well exploits load balancing features of the cloud platforms for complex application deployment requirements.

Web and Mobile Apps

This covers the complete software development life cycle, which includes designing, development, testing and delivering the final product. Our team has adequate experience in developing intelligent applications right according to your business needs. Our developed applications are scalable and can easily be integrated with your existing websites or portals.

Big Data and Analytics

Managing large chunks of data in a way that it could be utilized to extract the right piece of information is one of the most tedious tasks for any organization. It is crucial that no information goes to waste. We specialize in developing solutions that allow you to effectively sort and analyze the Big Data, in order to gain its maximum advantage to streamline your business processes.

Internet of Things

Internet of Things is the future of modern industry. All the systems are now quickly transforming into more advanced Machine Learning enabled setups. These systems ensure a more automated and user friendly experience for all kinds of users. IoT is crucial in today's day and time, to make sure that your business may stay up-to-date with the most advanced trends in the market.

Knowledge Management

Knowledge management is the systematic management of an organization's knowledge assets for the purpose of creating value and meeting organizational requirements. We specialize in providing comprehensive solutions that assist our clients to streamline the storage, assessment, sharing, refinement, and creation of knowledge through simple and secure cloud-hosted portals.

Applied Research

Our pool of engineers and computer scientists is the perfect blend for carrying out research and development in the latest technologies. We have executed projects that required deep understanding of process automation, data warehousing and business intelligence. Currently we are implementing systems that involve machine learning, computer vision and image processing.

iENGINEERING's reputation as a trustworthy technology solutions provider has been earned by the sheer dedication and hard-work of its team and the commitment to excellence by its leaders. The company's vision motivates its employees to define their own standards of quality that are destined to be a class apart.

Certifications

The Capability Maturity Model Integration (CMMI) is a process improvement framework that guides organizations to create high-performance, high-maturity cultures. We are a CMMI Level 5 certified software development organization.

We have been certified by TUV Austria as a QMS certified organization. QMS specifies requirements for an organization to demonstrate its ability to provide quality products and conform to applicable regulatory requirements.

Our facility is an ISMS certified software development center. ISMS is a model for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving an information security management system.

We are Service Management System (SMS) Standard certified. This ISO certification specifies requirements for the service provider to plan, establish, implement, operate, monitor, review and improve the Service Management System.
